SUMMARY

Computer Science graduate (Cum Laude, University of San Carlos) with a six-month software developer internship and ongoing freelance work building React and TypeScript web applications. Works across the stack, from real-time WebSocket interfaces to database schema design in PostgreSQL and MySQL, with C# and Node.js on the backend

EDUCATION

University of San Carlos Talamban, Cebu
Bachelor of Science Major in Computer Science July 2026
GPA: 1.55 / 1.0 Highest (Cum Laude), Dean's List 2022-2026
Coursework: Data Structures, Algorithms, Software Engineering, Web & App Development

PROFESSIONAL EXPERIENCE

Freelance Software Developer August 2026 – Present

Real-Time Scoreboard System (Pickleball Court)

- Built the WebSocket layer (server and client) and core React (TypeScript) frontend logic for a team-built real-time scoreboard across 2 courts, updating each court's TV display from dedicated remote devices with under 100ms latency.

Order Management System (Rice Wholesaler)

- Building the order and sales module of a warehouse management system for a local wholesaler processing 100+ order slips daily, using React, TypeScript, PostgreSQL, and Drizzle ORM.
- Designed the module's database schemas and backend, with stock deductions synced to warehouse inventory and daily sales summaries per cashier.

Alliance Software Incorporated September 2025 – March 2026

Software Developer Intern

- Took over an unfinished internal exit clearance system (React, TypeScript, C#) and brought it to company-wide rollout, replacing paper-based offboarding across HR and approvers.
- Fixed broken JWT authentication, faulty API endpoints and role-based access, restricting sensitive offboarding data to authorized roles.
- Presented the system to stakeholders and refined features with QA and ~15 employee testers.

UNIVERSITY PROJECTS

Event Management System November 2024 – December 2024

React, Node.js, Express, Prisma, MySQL GitHub

- Built an event management system with a modern web stack, streamlining event scheduling and user access with Google Sign-In authentication.

Personal Portfolio September 2026

React, TypeScript, Vite, Tailwind CSS, Framer Motion, Vercel

- Built and deployed a portfolio site on Vercel with animated layouts, an in-page resume viewer, and a contact form backend using serverless functions and Resend.

Retrieval Augmented Generation Framework (Thesis, IEEE Xplore) June 2025 – November 2025

Python, Milvus, Neo4j, LangChain GitHub

- Developed a hybrid RAG framework for financial question answering over 200 SEC filings, routing queries (97.5% routing accuracy) between dense/sparse vector retrieval in Milvus and a Neo4j knowledge graph built from structured financial statements.
- Graph-based retrieval raised answer correctness from 53% to 68% and context recall from 49% to 66% over a flattened JSON baseline, and the full pipeline outperformed a closed-book LLM on every evaluated metric across 17,000 QA pairs.

SKILLS

Languages: TypeScript, JavaScript, C#, Python, SQL, C
Frameworks & Libraries: React, React Native, Node.js, Express, .NET, Prisma, Drizzle
Databases: MySQL, PostgreSQL, Milvus, Neo4j
Tools: Git/GitHub, Azure DevOps, Postman, Vercel, Claude Code, Copilot
Spoken Languages: English (Fluent), Cebuano (Proficient)

CERTIFICATIONS & ACTIVITIES

PHILNITS FE Certification	October 2024
TESDA Programming (JAVA) NC II Certification	January 2024
Cisco CCNAv7 Certification	December 2023
Cisco Cyber Security Essentials Certification	November 2024
ACDSA 2026 Conference - Thesis Presentation	February 2026
Tech, AI & Career Readiness Program - Vietnam Immersion	May 2026
AI Experience @ Global City	May 2026
