CEDRIC THOMAS Y. RAFANAN

cedricrafanan27@gmail.com • cedraf.vercel.app • github.com/CedRaf • linkedin.com/in/cedric-rafanan

EDUCATION

University of San Carlos Talamban, Cebu
Bachelor of Science Major in Computer Science July 2026
GPA: 1.55 / 1.0 Highest (Cum Laude), Dean's List 2022-2026
Coursework: Data Structures, Algorithms, Software Engineering, Web & App Development

PROFESSIONAL EXPERIENCE

Freelance Software Developer August 2026 – Present

Real-Time Scoreboard System (Pickleball Court)

- Developing the React (TypeScript) frontend for a real-time scoreboard across 2 courts, where dedicated remote devices update each court's TV display over WebSockets with under 100ms latency.

Order Management System (Rice Wholesaler)

- Building the order and sales module of a warehouse management system for a local wholesaler processing 100+ order slips daily, using React, TypeScript, PostgreSQL, and Drizzle ORM.
- Designed the module's database schemas and backend, with stock deductions synced to warehouse inventory and daily sales summaries per cashier.

Alliance Software Incorporated September 2025 – March 2026

Software Developer Intern

- Built an internal exit clearance system using React (TypeScript) and C# that replaced paper-based offboarding routing across HR and department approvers.
- Engineered JWT-based authentication with role-based conditional rendering, giving HR admins and employees distinct access levels and restricting sensitive offboarding data to authorized roles.
- Presented system to stakeholders and worked closely with QA and ~15 employee testers to refine features, incorporating feedback ahead of company-wide rollout.

UNIVERSITY PROJECTS

Retrieval Augmented Generation Framework (Thesis, IEEE Xplore) June 2025 – November 2025
Python, Milvus, Neo4j, LangChain GitHub

- Developed a hybrid RAG framework for financial question answering over 200 SEC filings, routing queries (97.5% routing accuracy) between dense/sparse vector retrieval in Milvus and a Neo4j knowledge graph built from structured financial statements.
- Graph-based retrieval raised answer correctness from 53% to 68% and context recall from 49% to 66% over a flattened JSON baseline, and the full pipeline outperformed a closed-book LLM on every evaluated metric across 17,000 QA pairs.

Target Trial Emulation (Data Analytics) February 2025 – March 2025
Python, pandas, scikit-learn GitHub

- Implemented a Target Trial Emulation simulation by translating R to Python and integrating clustering methods to enhance time-to-event simulations.

Event Management System November 2024 – December 2024
React, Node.js, Express, Prisma, MySQL GitHub

- Built an event management system with a modern web stack, streamlining event scheduling and user access with Google Sign-In authentication.

SKILLS

Programming Languages: TypeScript, JavaScript, C#, Python, SQL, C
Frameworks & Libraries: React, React Native, Node.js, Express, Prisma, Drizzle, .NET
Databases & Tools: MySQL, PostgreSQL, Milvus, Neo4j, Git/GitHub, Azure DevOps, Postman, Vercel, Claude Code, Copilot
Spoken Languages: English (Fluent), Cebuano (Proficient)

CERTIFICATIONS & ACTIVITIES

Tech, AI & Career Readiness Program - Vietnam Immersion	May 2026
AI Experience @ Global City	May 2026
ACDSA 2026 Conference - Thesis Presentation	February 2026
Cisco Cyber Security Essentials Certification	November 2024
PHILNITS FE Certification	October 2024
TESDA Programming (JAVA) NC II Certification	January 2024
Cisco CCNAv7 Certification	December 2023
